Idea 1) TourGuide: This app will show the facts and remarkable things of the current location of the user. Target audience are tourist.

Quality Attributes	Priority	Reason
Performance	H	App should be dynamic and fast to display the result
Portability	H	App can be used at multiple platforms
Deployability	M	Updates could be of medium priority as there won't be continuous updates in the primary feature
Testability	M	Testability is high to get the accurate results all the time
Availability	L	App will be available all the times and reboot rapidly if any issue caused
Scalability	L	To store the data of all the locations and navigations

Idea 2) Organic product distribution: App that shows the organic product produced nearby and to buy the products straight from the farmers without travelling miles.

Quality Attributes	Priority	Reason
Security	H	Security should be high as payments will be involved in the application with user information
Performance	H	App should be accurate in location and fast processing
Interoperability	M	Interoperability with app and payment systems
Modifiability	M	Different module division according to different roles of app
Scalability	M	Storing the user information and the locations
Portability	L	Good to have the app on different platforms

Idea 3) SkillShare: Share whatever your skills are at one place with all the users. Contact them, hire them for the events or just enjoy and learn from the app.

Quality Attributes	Priority	Reason
Scalability	H	Large amount of data needs to be stored and processed
Performance	H	User friendly and should work without any glitch
Portability	M	Should be available on different platform

Testability	M	Should not have any major issues
Security	M	Security for user information
Availability	L	Should be available after an issue in some time
Interoperability	L	Interoperability between app and other sharing platform.
